Education

MallaReddy Institute of Technology and Science

Bachelor of Technology in Information Technology

July 2019 – August 2023

Hyderabad, Telangana

Experience

Synergy Universal

Associate Software Engineer

Dec 2023 – August 2024

Hyderabad, Telangana

- Developed responsive and dynamic web applications using React.js for front-end development and Node.js, Java, Spring Boot for back-end services.
- Designed and consumed RESTful APIs to connect front-end interfaces with server-side logic efficiently.
- Built reusable React components and implemented state management to ensure a smooth user experience.
- Utilized Node.js for building server-side functionality and handling asynchronous operations.
- Collaborated with UI/UX designers and team members to turn requirements into fully functional web solutions.
- Managed data storage and queries using SQL, optimizing database performance and ensuring data integrity.

Innomatics Research Labs

Front End Developer Intern

September 2024 – November 2024

Hyderabad, Telangana

- Developed and maintained full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built dynamic and responsive user interfaces with React.js, applying state management and reusable components.
- Designed and implemented RESTful APIs using Express.js and Node.js to handle server-side logic and database operations.
- Gained hands-on experience in deploying applications and troubleshooting issues during development and testing phases.

Projects

Food Recipe Website | *Html, CSS, JavaScript*

- Designed and developed an interactive food recipe website using React.js, HTML, CSS, and the Fetch API, allowing users to easily find recipes based on specific ingredients.
- Implemented a dynamic search feature where users can enter any ingredient and instantly view a list of recipes containing that item.
- Integrated external recipe APIs using Fetch API to retrieve and display up-to-date recipe data in real-time.
- Focused on modular code structure and clear state management for maintainability and scalability.

Book-Store-App | *React.js, Node.js, Express.js, MongoDB, Firebase, and Redux Toolkit.*

- Developed a fully functional Book Store web application using React.js, Node.js, Express.js, MongoDB, Firebase, and Redux Toolkit.
- Developed a full-stack Book Store web application where users can buy and sell books securely.
- Implemented user authentication and registration using Firebase, allowing users to create accounts, log in, and manage their book listings and orders.
- Designed and developed robust RESTful APIs with Node.js and Express.js for handling book inventory, user data, and order processing.

Portfolio Website | *HTML, CSS, JavaScript, React.js*

- Designed and developed a personal portfolio website using React.js, HTML, CSS, and JavaScript to showcase my skills and web development projects.
- Used modern design principles and interactive elements to provide an engaging user experience and demonstrate front-end proficiency.

Technical Skills

Languages: Java, JavaScript

Web Technologies: HTML/CSS, ReactJS, NodeJS, ExpressJS

Databases: MySQL, MongoDB

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Firebase **Technologies/Frameworks:** GitHub, SpringBoot, RESTAPI
